TAMANNA RAHMAN
FULL STACK DEVELOPER

PROFILE

Highly experienced developer with 8+ years of expertise specializing in problem-solving and analysis. Proficient in delivering top-notch solutions aligned with client and business requirements, while adhering to the SOLID principle and leveraging Agile methodology. Exceptional interpersonal abilities facilitate seamless collaboration with cross-functional teams, driving towards the attainment of project objectives. Confident in my abilities to contribute significantly as a skilled and motivated developer to any team.

EXPERIENCE

Global Charge Ltd | LONDON, UK
Software Engineer | Sep 2023- Nov 2024

Responsibilities:

- Developed backend functionalities for a payment gateway using Spring Boot and Node.js.
- Implemented pooling and WebSocket integration in Node.js for efficient data processing and real-time communication.
- Integrated and managed 3rd party APIs to facilitate seamless interaction between systems.
- Utilized Docker for streamlined deployment and scalability of applications.
